

## SUPPORT FOR MANAGERS

# Manager Consultations

Lyra offers manager consultations with clinical specialists to support HR business partners or managers dealing with concerns related to member mental health. Consultation support is available via Lyra's 24/7 Care Navigator Team phone line and can be used to obtain guidance on concerns such as members exhibiting signs of distress or critical incidents that impact members' emotional well-being.

To initiate a consultation, please call Lyra's Care Navigator Team. Let the Care Navigator know you're requesting a manager consult, the reasons for your request, and whether the consultation request is urgent. For urgent requests, a clinical specialist will contact you within one hour. For non-urgent requests, a clinical specialist will respond within one business day.

## Examples of management consultations:

Support for HR business partners or managers dealing with concerns related to member mental health, such as:

-  Member has been absent from work and showing signs of distress
-  Member passed away and manager needs guidance on how to share with team
-  Member expressed suicidality or mental health concerns to manager
-  Member returning to work after being out for a behavioral health condition
-  Coaching on how to discuss help-seeking and the Lyra benefit with an member
-  Member shows up to work intoxicated

Lyra is not able to provide urgent or emergent services for members. If you believe an member is at imminent risk of harming self or others, do not call Lyra; call 911 or your security team, consistent with your company's protocol. Lyra cannot proactively contact an member of concern. However, we can consult with you on how to encourage an member of concern to contact Lyra for in-the-moment support and connection to care.
